Media Production Company | Scalable IT & High-Performance Network for Creative Teams

A media production company partnered with Reverie Tech to modernize IT infrastructure, enhance network performance, and support high-volume content creation and collaboration across multiple locations.

About the Client

The client produces video and audio content for multiple platforms, handling large files daily. Teams work remotely and on-site, often needing simultaneous access to project files, high-speed rendering, and collaborative editing tools.

The Challenge

The company struggled with:

- Slow network speeds and storage access hindering production deadlines
- Disconnected software and systems across departments
- Frequent IT downtime interrupting creative workflows
- Limited internal IT resources for proactive maintenance and scaling

The Solution

Reverie Tech implemented:

- High-performance network infrastructure and cloud-based storage
- Centralized IT management integrating production, collaboration, and file-sharing tools
- Automated backup, monitoring, and maintenance systems
- Workflow automation for repetitive IT tasks, including file transfer and system updates
- Ongoing support and IT consulting to scale systems with project demand

The Results:

- 60% faster file transfer and system response times
- Near-zero downtime during critical production windows
- Scalable infrastructure supporting multiple concurrent projects
- Enhanced collaboration and productivity for creative teams

Client Feedback

"Reverie Tech keeps our production running smoothly. Downtime is rare, and collaboration has never been easier."

– CTO, Media Production Company
